

## Create a new Ballpark

### Edit Ballpark Form

1. Open Action PC Baseball.
2. Select "Organize".
3. Select "Ball Parks".
4. Select one of the empty locations ("No Name").
5. Type in the "Biographical Data", ballpark name, city and select the first and last year.
6. Select the playing surface and roof information (Search on the web).
7. Select the foul territory, precipitation and wind ( I use a similar ballpark as an example or average).
8. Type in the "Outfield Fence" distances (Search the web).
9. Type in the "Average Temperature", I use a ballpark located in the same city or one that is geographically similar.
10. Type in the "Statistical Impact" data, I use a similar ballpark.
11. Select the year.
12. Follow the steps to install a ballpark image

A good source for baseball ballpark information while creating your own MLB ballpark can be found on the web site [www.ballparks.com](http://www.ballparks.com).
